SINGLE PASS COLOR TECHNOLOGY BY OKI

Network or Local Printing, Plus High-Quality Color Copies Right in Your Workspace.

Shown here with optional copier stand.

You know that color can give your documents more impact. Therefore, you want color printers and copiers for your business. And you want them to be fast, flexible and affordable.

That's what you get with the 8 cpm OKICOLOR™ 8 Convenience Color Copier Systems. They can bring high-resolution, networkable or stand-alone digital printing and local copying to the desktop.

Save time. Save money.

Instead of running to the copy center every time you need color copies, use your new Convenience Color Copier System to produce up to 99 color copies from one original at a fast 8 cpm.

And pocket the difference by not having to pay thousands of dollars more for a dedicated color copier.

Choose your level of convenience.

With OKICOLOR 8 Convenience Color Copier Systems, you have the choice of network or desktop color printing along with local color copying.

The OKICOLOR 8n CCCS (P/N 62414210) delivers fast color print output from anywhere on the network. Factory-configured with the OKILAN® 6100e+ 10/100 Base-T Ethernet Internal Print Server, the OKICOLOR 8n CCCS is at home in the most popular shared environments.

Or choose the OKICOLOR 8 CCCS stand-alone model (P/N 62414207) and if your needs change, outfit it with an OkiLAN 6100e+ Internal or OkiLAN 6010e External 10 Base-T Print Server option.

The flatbed copier stacks the system in your favor.

Here's a feature set that rivals dedicated color copiers:

- 8 cpm in brilliant full color and sharp black-and-white
- True 600 dpi full-color output
- Up to 99 copies from a single original
- Reduce or enlarge from 25% to 400% in 1% increments
- 7 levels of control for density and color intensity
- Background removal

Place your copier system on the optional stand and you can enjoy its terrific performance and convenience even when space is limited!

Making you and your work look good in many ways

For high-quality, permanent color document printing — on the network or stand-alone — and brilliant local color copying at an affordable price, the OKICOLOR 8 Convenience Color Copier Systems are your solution.

### OKICOLOR 8 Convenience Color Copier Systems Include:

- OKICOLOR 8n network printer (factory-configured with OkiLAN 6100e+ Internal Print Server) or OKICOLOR 8 stand-alone printer
- Flatbed copier unit
- Standard IEEE 1284 bidirectional parallel cable (connects printer to copier)
- DB25 to MDR36 copier cable (connects copier to print server)
- RJ45 cable (connects print server to network)

OKI
People to People Technology™

Technology-driven reliability.
Industry-leading support.

Driving the performance of the OKICOLOR® 8 Convenience Color Copier Systems is OKI Digital LED Technology. Unlike lasers, which print through a complicated set of rotating mirrors and moving parts, the OKI printing process uses flashing pinpoint beams of light that go straight to the photo-receptive image drum.

It's a more sensible printing technology: Digital LED Printing. Simply Smarter Than Laser.™

The rock-solid OKI digital LED printhead utilizes a stationary array of pulsing light-emitting diodes (detail) to create high-resolution text and graphics.

Reliability to count on

Because it's so reliable, OKI backs the OKICOLOR 8 Series Digital LED Color Printers with a 1-year on-site limited warranty on parts and labor, and the industry's only 5-year print-head warranty. The flatbed copier unit is backed by OKI with a 14-month limited warranty on parts and labor that includes Overnight Exchange.[1]

Should you need technical assistance, count on OKIcare™
